SUMMARY

A fresh graduate in Informatics Engineering from Brawijaya University with experience and strong interest in software development, both as front-end and back-end developer, especially has a very high enthusiasm for front-end development. Have experience in creating web applications, slicing ui/ux, mobile applications, and making an analysis before developing software. Enjoys learning things, such as learning new programming languages and frameworks.

EDUCATION

Brawijaya University   **Malang, Indonesia**
Informatics Engineering(GPA: 3.43/4.00)   *Aug 2021- Aug 2025*

EXPERIENCE

Internship at PT Kalbe Farma Tbk (MSIB Batch 6)   **Bekasi, Indonesia**
Fullstack Web Developer   *Feb – June 2024*

Developing web (Clinic Data Center) for company requirement. Built a Clinic Data Center web app from scratch using ASP.NET and SQL Server. I designed the database, developed the admin panel UI based on system analyst mockups, and implemented CRUD features for clinic data management. Handling both frontend and backend.

Laboratory Asistant   **Malang, Indonesia**
Asistant   *March-June 2023*

Teaching practical sessions to students about operating systems, especially Linux, using VirtualBox

PERSONAL/ GROUP PROJECT

Karya Hutama Oxygen | Point of Sale System   **Malang, Indonesia**
Fullstack Developer   *Jan 2025 – March 2025*

- Developed a custom POS system using Laravel (web) and Flutter (mobile) for managing building materials transactions.
- Built essential modules including product, category, supplier, user, transaction, and billing management.
- Designed mobile app with Flutter to handle real-time item selection and transactions.
- Integrated barcode scanning, item history logs, and Excel export for accurate inventory and reporting.
- Design and develop APIs for integration with mobile applications.

Touratur.id | Landing Page for Travel Service   **Malang, Indonesia**
Web Developer   *May 2025*

- Designed and developed a static promotional website to showcase tour packages and travel services.
- Built a modern and responsive landing page.
- Developed from scratch based on CV branding and business goals.

Clinic Data Center | Clinic Management   **Bekasi, Indonesia**
Web Developer   *March - June 2024*

- Used C# programming language with ASP .Net framework to develop a website.
- Implementation design system from System Analyst.
- Managing the MCU's employee Kalbe Company.
- Digitalization of clinic information system.

AcadeMate | Rent Mentor App   **Malang, Indonesia**
Mobile Front-end Developer   *Nov 2023*

- Created an Android app for renting mentors, customized for Informatics Engineering students
- Utilized Kotlin programming language with Jetpack Compose which can lead to faster development times and reduced costs with Android Studio
- Designed in such a way to ensure users find it easy and comfortable to use
